Our drive along the picturesque North-West Coast of Trinidad takes us to the busy peninsula of Chaguaramas. Sheltered deep water bays and coves indent this part of the island, where marinas and boat yards offer professional services for boats from all over the world. This area is also a national park and covers 14,572 acres. Our easy hike takes us into the beautiful forest where we admire the tropical flora and fauna and enjoy the

sights and sounds of the tropics. We then continue our hike to the amazing "Bamboo Cathedral", a stretch of approximately 300 meters where the bamboo stalks bend over towards each other forming a canopy above the road. The arches formed above bear a resemblance to those found in a cathedral and have remained unchanged for 150 years. Michel Jean Cazabon, a famous local nineteenth century artist, used the Bamboo Cathedral as the subject of many of his watercolors and in honor of him the route has been named the Cazabon Trail. This hike provides an opportunity for a picturesque, romantic walk for those who enjoy the sights and sounds of nature.

DESCRIPTION –GASPAREE CAVES ADVENTURE

Following a short drive to historic Chaguaramas passengers will disembark at the boat yard in Chaguaramas and board a pirogue which will take you to the Gaspar Grande island where we disembark and make our slow walk for approximately 20 minutes to the entrance of the Gasparee Cave – a subterranean system which is 90ft deep and half an acre in size. Arriving at the caves. you will descend through the smaller of two sinkholes to explore this natural wonder – which is filled with fascinating stalagmites, stalactites, flow stones, pillars, ribbons and fringed curtains, and other Limestone features, with names such as Pulpit Pipe Organ, Lovers, Dinosaur Head and others. Inside the cave is a saline pool, 30ft in diameter, its water level fluctuating with the tides, and is home to a few forms of marine life. Natural light fills the cave through a huge sinkhole above the pool, and fills the cave with a heavenly aura. You will then return to the boats for a short ride back to the mainland to board the bus for the port.

(Notes: This tour is not recommended for the inactive individual. The short walk – 20 minute - to the Cave though on concrete pathway, is a continuous uphill climb – about 25-degree incline. This is followed by a descent into the cave - about 100 steps down and back up. The Cave is truly spectacular and for those interested in seeing the wonders of nature, it is a must to visit.)

As the capacity of the cave is limited to 20 pax at one time we will do the 2 departures from the ship if required

This would also be our first stop where we take a walk through the village and let the locals share with you how they grow their herbs and prepare them for market. From here we continue along the hilly north coast road descending along the Maracas Royal Road towards the Maracas lookout making our second stop and continue to Maracas Beach for a swim and walk along the white sandy bay and even before pressing on. After this breath-taking Mountain Adventure, we head back via Maraval.

This tour is an adventure, with lots of fun and offers you the opportunity of meeting the locals and tasting some good local dishes. Light homemade refreshment is served at Paramin hills prepared by the locals, a treat that is mouth-watering.
